

Weather Satellite Launch Bingo

On June 25, 2024, a new weather satellite, called GOES-U, will be launching into orbit. (GOES is short for Geostationary Operational Environmental Satellite.) GOES-U is part of a group of NOAA (National Oceanic and Atmospheric Administration) satellites that keep an eye on Earth's weather from space. It will also monitor space weather, which is activity in the sun's atmosphere.

Watch the GOES-U launch broadcast online and cross off each box below when you hear any of these words mentioned. When you get a bingo, ask a grownup to share a photo of your board with us on Facebook or Twitter by tagging @NOAASatellites and using the hashtag #ReadyToGOES!

B I N G O

NOAA	Sun	Hazard	Tornado	Weather
Ocean	Earth	Lightning	Storms	Hurricane
Detect	Orbit		GOES-T	Warnings
Rocket	Liftoff	Space Weather	Forecast	Clouds
Climate	NASA	Atmosphere	Satellite	Science
