

Hello.

Quick Start Guide

Welcome to your new MacBook Pro.

Let us show you around.

This guide shows you what's on your Mac, helps you set it up, and gets you up and running with tips for the apps you'll use every day.

Your battery is charged and ready to go, so you can start using your Mac right out of the box.

When you do recharge the battery, you'll know it's fully charged when the orange light on your power connector turns green.

Security slot

SuperDrive

Reads and writes CDs and DVDs

Gigabit Ethernet
Connect to the Internet
or a local network

USB 3
Charge devices, connect
external storage, and more

Headphone
Plug in headphones
or external speakers

MagSafe power
Magnetically attach
the power cord

FireWire 800
Connect external
hard drives and more

Thunderbolt
Connect external
displays and high-
performance devices

SDXC
Transfer photos
from your camera's
memory card

FaceTime HD camera
Make video calls, capture HD
video, and take snapshots

To learn more about ports and connectors, go to support.apple.com/kb/HT2494.

To learn more about the battery, go to www.apple.com/batteries.

Let's get started

Press the power button to start up your MacBook Pro, and Setup Assistant guides you through a few simple steps to get you up and running. It walks you through connecting to your Wi-Fi network and creating a user account. And it can transfer your documents, email, photos, music, and movies to your new Mac from another Mac or PC.

Sign in with your Apple ID in Setup Assistant. This sets up your account in the Mac App Store and the iTunes Store, and in apps like Messages and FaceTime, so they're ready the first time you open them. It also sets up iCloud, so apps such as Mail, Contacts, Calendar, and Safari have all your latest information. If you don't have an Apple ID, create one in Setup Assistant.

To learn more about transferring files to your new Mac, go to support.apple.com/kb/HT6408.

Control your Mac with Multi-Touch gestures

You can do a lot on your MacBook Pro using simple gestures on the trackpad. Here are some popular gestures. To learn more, choose System Preferences in the Dock, and then click Trackpad.

- **Click**
Press anywhere on the trackpad.
- **Secondary click (right click)**
Click with two fingers to open shortcut menus.
- ↕↕ **Two-finger scroll**
Brush two fingers along the trackpad to scroll up, down, or sideways.
- ↔↔ **Swipe to navigate**
Swipe with two fingers to flip through webpages, documents, and more.

Get to know your desktop

The desktop is where you can find everything and do anything on your Mac. The Dock at the bottom of the screen is a place to keep the apps you use most. It's also where you can open System Preferences, which lets you customize your desktop and other settings. Click the Finder icon to get to all your files and folders.

The menu bar at the top has useful information about your Mac. To check the status of your wireless Internet connection, click the Wi-Fi icon. Your Mac automatically connects to the network you chose during setup. You can also find anything on your Mac and look up information using Spotlight.

Find the app you want

Your Mac comes with great apps you can use to make the most of your photos, create documents, browse the web, and more. Use Launchpad to easily find all the apps on your Mac. Arrange apps any way you want and even group them in folders.

Find new apps on the Mac App Store. When you download an app you like, it appears in Launchpad. The Mac App Store lets you know when app and OS X updates are available, and can update them automatically.

Open Launchpad

Click the icon in the Dock.

Folders

Group apps by dragging one on top of another.

Browse the Mac App Store

Click the icon in the Dock.

Your data, up to date, on all your devices

iCloud lets you access your music, photos, calendars, contacts, documents, and more from your Mac, iOS devices, and even your PC. It keeps everything up to date automatically.

Create a Pages document, take a photo, or buy a song with one device, and it's instantly available on all the others. With iCloud Drive, you can store your files in iCloud and organize them any way you like. Family Sharing makes it easy to share family members' iTunes Store, App Store, and iBooks Store purchases. iCloud helps you locate and protect your Mac if you misplace it. To choose the iCloud features you want, click System Preferences in the Dock, then click iCloud.

Use your Mac and iOS devices together

When you sign in to iCloud on your Mac and iOS devices,* they recognize when they're near each other, enabling amazing features. You can make and receive iPhone calls on your Mac, using your Mac as a speakerphone. SMS messages sent to your iPhone appear in Messages on your Mac, so you can keep track of all your conversations. With Instant Hotspot, your Mac can automatically use the personal hotspot on your iPhone. And with Handoff, you can start an activity on your Mac and pick it up right where you left off on your iOS device—and vice versa.

iPhone calls

Make an iPhone call or send a text message by clicking a phone number on your Mac.

Handoff

An app icon appears in the Dock when an activity is handed off to your Mac.

*Requires a device running iOS 8 or later. Your Mac and iOS device must be signed in to the same iCloud account.

Safari

Safari is the best way to surf the web on your Mac. Just click in the Smart Search field and see icons for your favorite websites, or type a search term or web address—Safari knows the difference and will send you to the right place. You can save

webpages to your Reading List to read later, and pin the websites you visit often, so they are open, up to date, and easy to access. The Tab view organizes all of your tabs and makes it easy to locate the one you're looking for.

Sidebar

Your bookmarks, Reading List, and Shared Links appear in the Sidebar.

Favorites view

Click the Smart Search field to see icons for your favorite websites.

Share

Easily send webpages or share them with your social networks.

Mail

Mail lets you manage all your email accounts from a single, ad-free inbox. It works with popular email services like iCloud, Gmail, Yahoo Mail, and AOL Mail. With Mail Drop, large attachments are automatically uploaded to iCloud. And Markup

lets you fill out and sign forms or annotate a PDF. You can even delete or mark messages as read or unread with a swipe on your trackpad. The first time you open Mail, Setup Assistant helps you get started.

One-stop email

View all your accounts in Mail.

Swipe to manage

Swipe with two fingers to manage your inbox.

Search

Quickly narrow search results to find exactly what you want.

The screenshot displays the Mail app interface. On the left, a list of email threads is visible, including messages from Lauren Kerr, Sean Bullyg, Paul Hiki, Cary Quyen, Kelly Attkin, Ted Paquin, Charles Parrish, Coco Weir, Will Sharp, Kyle Olson, Lisa Gee, and Steven Richey. The main view shows an email from Lauren Kerr to Eden Sears regarding a rooftop party. The email text includes: "Hi Eden, I really wish you could have been at Erik's housewarming party. His place is pretty terrific (especially the rooftop deck). And I can't believe how grown up everyone has become. Home ownership. Spouses. I remember when we had to scrounge for change in the sofa cushions just to buy a pizza. I still do that, by the way. But the sofa is much nicer. Anyway, sorry you couldn't make it. We agreed that we're not having the next party without you. Well, maybe we will, but we won't enjoy it. So do something about that busy schedule of yours. Miss you. Lauren". Below the email text is a photograph of a group of five people (three women and two men) sitting around a table on a rooftop patio at night, illuminated by string lights and large paper lanterns.

Calendar

Keep track of your busy schedule with Calendar. You can create separate calendars—one for home, another for school, and a third for work. See all your calendars in a single window, or choose to see just the ones you want. Create and send invitations to events, then see who

has responded. Add a location to an event, and Calendar will include a map and the weather forecast, calculate travel time, and alert you when it's time to leave. Use iCloud to automatically update calendars on all your devices or share calendars with other iCloud users.

Add an event

Click + to quickly create a calendar event.

Event inspector

Calendar shows an event's location on a map and calculates travel time.

Calendar view

Select the view you prefer—day, week, month, or year.

The screenshot displays the macOS Calendar application interface. At the top, there are navigation options for 'Day', 'Week', 'Month', and 'Year', with 'Week' selected. A search bar is visible on the right. The main area shows a weekly view for June 2015, with days from Sunday to Saturday. A pop-up window titled 'Brunch with David' is open over the Tuesday, June 9 event. This window includes the event title, time (9 AM to 11 AM), location (600 Guerrero St, San Francisco, CA 94110-1528), travel time (15 minutes), and a map showing the location. Below the map, there are options to 'Add invitees', 'Add Notes, URLs, or Attachments', and 'Alert when I need to leave'. The calendar grid itself is filled with various events, each represented by a colored block with its title and time. For example, on Monday, there is a 'Review proposal' event from 10:30 AM to 11:30 AM. On Tuesday, there is a 'Bake sale' from 2:30 PM to 3:30 PM. On Wednesday, there is a 'Board games' event from 4 PM to 5 PM. On Thursday, there is a 'Plano recital' at the Auditorium from 4 PM to 5 PM. On Friday, there is a 'Movie' from 5 PM to 6 PM. On Saturday, there is a 'Movie' from 5 PM to 6 PM.

Just log in with your Apple ID, and you can send and receive both iMessage and SMS messages, including text, photos, videos, and more, to your friends on a Mac, iPad, iPhone, or iPod touch. With iMessage, you can even start a conversation on one device and

pick it up on another. You can easily start and manage group conversations, including adding a title and new participants. And if you want to talk to someone face to face, you can start a FaceTime video call* right from a conversation in Messages.

Replies in progress

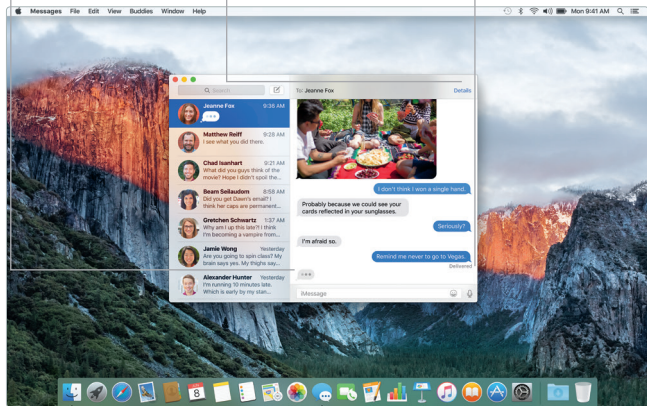

Three dots mean your friend is typing a reply.

Manage conversations

Click Details to start a FaceTime call or see the attachments from your conversation.

Delivery receipts

See when your message has arrived.

*Requires FaceTime-enabled device for both caller and recipient. Not available in all areas.

Maps

Explore new destinations and get directions on your Mac with Maps. View locations using standard or satellite imagery, or use Flyover to soar through select cities in photorealistic 3D. You can look up information for local points of interest like restaurants and hotels,

and Maps shows you phone numbers, photos, and Yelp reviews. Once you find your destination, Maps provides point-to-point directions for driving, walking, or even mass transit (in select cities) that you can send to your iPhone for navigation on the go.

Directions

Maps provides detailed directions, including traffic information.

Transit

Map your route using bus, train, subway, or ferry.

Send to iPhone

Send directions to your iPhone for voice navigation on the way there.

Directions | Search for places or address | Map | Transit | Satellite

Start: Columbus Circle
End: Prospect Park

Drive | Walk | Transit

Leaving Soon

39 minutes
Every 10 min - 500 ft walking

- 1840 Broadway, New York, NY 10023-7602, United States
- Walk 200 ft About 1 minute
- 69 St-Columbus Cir Subway station
- B Train Downtown toward Brighton Beach Every 10 min - 30 min ride
- Prospect Pk Exit train
- Walk 300 ft About 2 minutes
- Prospect Park W, Brooklyn, NY 11215, United States

Spotlight

Spotlight is an easy way to find anything on your Mac—documents, contacts, apps, messages, and more. No matter what you're doing on your Mac, you can access Spotlight through its menu icon or by using the Command-Space keyboard shortcut. Just start typing, and

Spotlight shows you rich previews of your results. You can use Spotlight to look up information from sources like Wikipedia, Bing, Maps, movies, weather, stocks, sports, and more,* and to convert currencies and units of measure.

Results

See Spotlight results on the left and scroll through them.

Previews

Interact with previews right from Spotlight.

Easy access

Click the Spotlight icon in the menu bar or press Command-Space.

*Not all features are available in all areas.

iTunes makes it easy to enjoy your music, movies, TV shows, and more. The iTunes app on your Mac includes the iTunes Store, where you can discover classics or new

favorites. It also features Apple Music—a revolutionary music service, Beats 1 live radio, and Connect, where fans can interact with their favorite artists.

Your library

Organize and enjoy your music, movies, TV shows, podcasts, and more.

Apple Music

Subscribe to choose from millions of songs. Listen to Beats 1 live radio. Connect with your favorite artists.

iTunes Store

Discover and buy new music, movies, TV shows, and more.

Photos, iMovie, and GarageBand

Photos, iMovie, and GarageBand give you amazing ways to create and share your photos, movies, and music. Photos automatically keeps your library organized and helps you create gorgeous photo books, cards, and calendars. And with iCloud Photo Library, you can keep your entire collection

of photos and videos in iCloud and view them on all of your devices. iMovie lets you turn your home videos into beautiful movies and epic Hollywood-style trailers. And GarageBand has everything you need to learn to play an instrument, write music, or record a song.

Photos

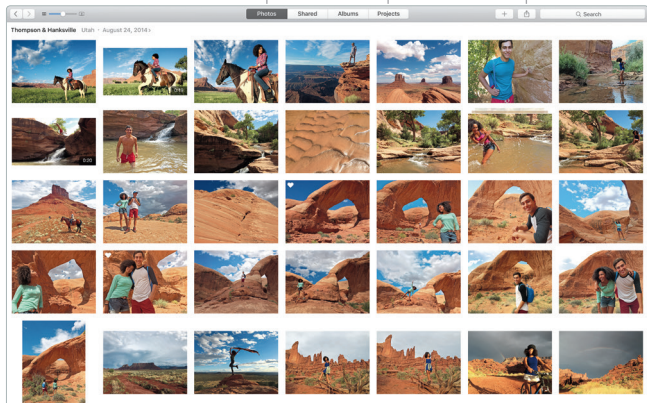

Photos are automatically organized by date and location.

Projects

Easily create and order personalized books, cards, and calendars.

Share

Post your favorites to Facebook or share them with iCloud or Messages.

Pages, Numbers, and Keynote

Create stunning documents, spreadsheets, and presentations on your Mac. Beautiful templates give you a great head start—simply add your own words and photos. And customizing everything is a snap

with the context-sensitive Format Panel. You can even open and edit Microsoft Office files. And you can quickly and easily share a link to your work with Mail or Messages, right from your toolbar.

Add graphics and more

Create media-rich documents with images, movies, charts, and more.

Share

Easily share a link to your work with Mail or Messages.

Format Panel

Your tools are just a click away with the intelligent Format Panel.

The screenshot displays the Pages application window. The main document area shows a page with a background of green tea leaves. The text 'The Art of Tea' is centered in a large, white, sans-serif font. Below the text is a small icon of a teapot and cups, with the text 'Japanese Tea Ceremony' underneath. On the left side, there is a 'Pages' sidebar showing a list of page thumbnails. On the right side, the 'Format Panel' is open, showing various formatting options such as Font, Alignment, Spacing, and Bullets & Lists. The top of the window shows the standard macOS menu bar and the Pages application toolbar.

Back up your data

You can back up your MacBook Pro using Time Machine with an AirPort Time Capsule (sold separately). Open System Preferences and click the Time Machine icon to get started.

An important note

Please read this document and the safety information in the *Important Product Information Guide* carefully before you first use your computer.

Learn more

You can find more information, watch demos, and learn even more about MacBook Pro features at www.apple.com/macbook-pro.

Help

You can find answers to your questions, as well as instructions and troubleshooting information, in Mac Help. Click the Finder icon, click Help in the menu bar, and choose Mac Help or “Get to know your Mac.”

OS X Utilities

If you have a problem with your Mac, OS X Utilities can help you restore your software and data from a Time Machine backup or reinstall OS X and Apple apps. If your Mac detects a problem, open OS X Utilities by restarting your computer while holding down the Command and R keys.

Support

Visit www.apple.com/support/macbookpro for MacBook Pro technical support. Or call 1-800-275-2273. In Canada, call 1-800-263-3394.

Not all features are available in all areas.
