

**College of DuPage
Severe Weather Protocols**

Condition Blue

Initiating Event

- ✓ National Weather Service Storm Prediction Center issues a Moderate or High Risk for severe thunderstorms for the day one period as issued by 13 Z (GMT), 1630Z or 20Z. Reception of information will be via NOAAPORT, EMWIN or by checking Internet sources at <https://weather.cod.edu/campusweather/>

Actions to be Taken Immediately

- ✓ Meteorology department forecaster will e-mail all staff with message indicating the threat for severe weather as enumerated in the Hazardous Weather Outlook or the Public Severe Weather Outlook Statement.
- ✓ If meteorology department forecasters deem that there is a significant threat for severe weather even when the area is not under a moderate or high risk, an e-mail will be addressed to all staff outlining the threat.
- ✓ An attempt will be made to contact Police Department with pertinent information by the staff at COD Meteorology or vice-versa.

Ongoing Actions

- ✓ Check updated weather information throughout day and monitor for changes in outlook or the issuance of a severe weather watch.

Mail Headers

- ✓ Subject: Urgent Weather Message
- ✓ Header: An important weather information statement follows.

EVDPRP members and trained weather spotters should be alert for changing weather conditions and notification of further action.

**College of DuPage
Severe Weather Protocols**
